1. EXECUTIVE SUMMARY

GCT is embarking on a strategic journey to launch a differentiated **Mobile Virtual Network Operator (MVNO)** service, seamlessly integrated within its **ecosystem**.

MVNE (Pty) Ltd, supported by the **DSG Group of Companies**, is honoured to submit this comprehensive proposal — offering both a **Full MVNO** and **Digital Mobile (MVNO Light)** solution. Each is designed to meet GCT's growth ambitions, regulatory obligations, and customer experience objectives.

Drawing on over a decade of **MVNO enablement experience**, a **proven technology platform**, and a **track record of successful deployments** for leading African brands, MVNE brings an end-to-end capability that ensures delivery, agility, and scalability.

Our Commitment

We commit to delivering:

- **End-to-end MVNO enablement:** Full lifecycle support, including SIM provisioning, network integration, billing, customer management, and value-added services.
- **Seamless VAS integration:** Robust APIs and workflow automation for ensuring real-time data and unified customer experiences.
- **Regulatory compliance:** Full adherence to relevant **Nigerian Communications Commission Regulations, NCC SIM Registration Regulations, NIMC Integration (National Identity Number – NIN), Nigeria Data Protection Act (NDPA), 2023** and all Nigerian telecommunications standards.
- **Rapid time-to-market:** A project plan aligned to GCT's go-live targets, supported by a dedicated delivery team with local and international MVNO launch experience.
- **Exceptional customer experience:** Omni-channel support, analytics-driven insights, and loyalty program integration across digital and mobile touchpoints.
- **Flexible commercial models:** Transparent pricing and scalable revenue-share options designed for sustainable growth.

We are confident that this partnership — leveraging MVNE's expertise and the broader DSG Group's capabilities — will enable GCT to unlock **new revenue streams**, **enhance customer engagement**, and **differentiate its market offering** within the Nigerian telecoms' services ecosystem.

DSG Group Capabilities Supporting GCT

As a group we have a broad and extensive skill set and product range, that enables our customers and partners to build unique differentiated solutions, that deliver on identified needs in the market.

Business Unit	Focus Area	Key Capabilities
	Integrated CX solutions for consumer-facing organisations	Omni-channel support (contact centre, social media, WhatsApp, SMS, email), IT service desk, workforce management, CRM and BI solutions

Business Unit	Focus Area	Key Capabilities
 DIGITALISE THINK DIGITAL	Design and development studio	Digital transformation, web & app development, SEO/PPC management, social CRM, enterprise workforce management
 bb broadband	AI-driven mobile marketing and customer engagement	AI content & campaign management, digital advertising, SEO/SEM, social media management, Xanite (CVM) , PersAIc (AI persona targeting)
 digitalmall.com Our world is your basket!	Turnkey e-commerce platform	Fast-to-market online store enablement and integration for consumer brands
 MVNE mobile virtual network enabler	MVNO enablement and ecosystem management	Commercial viability analysis, full MVNO platform, VAS integration (insurance, OTT, eSIM, devices, Safe Family, Sentiance, MARS – revenue assurance)
 Digital Resilience Build Digital Resilience Across Your Business Core Systems	Cybersecurity solutions	Managed security services, enterprise and consumer cyber defence, risk management
 EelInsurer CYBER INSURANCE	Cyber insurance provider	Identity theft protection, data restoration, cyberbullying coverage, cyber extortion response

2. BACKGROUND & OBJECTIVES

2.1. Company Background

MVNE (Pty) Ltd is South Africa's leading Mobile Virtual Network Enabler, established in 2013 and a wholly owned subsidiary of DSG. We have enabled successful MVNO launches for brands such as DSTV Internet, AFGRI Connect, eMobile, and Digital Mobile, and are recognised for our innovation, reliability, and compliance.

Our platform is designed for seamless integration with third party ecosystems, supporting payments, lending, insurance, and loyalty products.

GCT's Strategic Objectives

This proposal outlines a comprehensive, low-risk, scalable MVNO enablement partnership between **GCT** and **MVNE**, designed to launch and grow a **Tier-5, digital-first MVNO in Nigeria**, with an explicit focus on:

- **Underserved consumer segments** in North and South-East Nigeria
- **Enterprise and SME mobility solutions**
- **A capital-light, OPEX-only commercial model**
- **National roaming across all three Nigerian MNOs**

The model leverages MVNE's full-stack MVNO enablement capabilities (OSS/BSS, CVM, digital channels, roaming, security and value-added services) while allowing GCT to scale rapidly to:

- **~1 million subscribers within 3 years**
- **~2 million subscribers within 5 years**

This proposal applies proven MVNO commercial principles, risk allocation, and phased scalability approaches that MVNE has deployed across multiple African MVNO and enterprise connectivity initiatives. The model is enhanced for the Nigerian market and extended to include **Travel eSIM** and **McAfee security services** as core differentiators.

2. Strategic Context & Market Rationale

2.1 Geographic Focus

GCT will initially focus on:

- **Northern Nigeria** – large, underserved populations, price-sensitive but high-volume data demand
- **South-East Nigeria** – entrepreneurial SME base, cross-border travel, enterprise and trade-driven mobility needs

This dual-region strategy balances **volume-led consumer growth** with **higher-margin enterprise use cases**.

2.2 Market Opportunity

- Nigeria remains a **multi-SIM market** with high churn and limited service differentiation

- Existing MVNO activity is still early-stage, with approximately **three meaningful MVNOs** currently active
- Enterprise mobility, travel connectivity, and device security remain **poorly addressed** by traditional MNO offers

GCT's opportunity lies in combining:

- National roaming
- Digital-first distribution
- Value-added services
- Strong CVM and personalisation

into a **non-price-led, defensible MVNO proposition**.

2.2. MVNE's Alignment

Our proposal is fully aligned with GCT's objectives, offering:

- **Seamless integration** with GCT's platforms.
- **Scalable infrastructure** for rapid deployment and future growth.
- **Comprehensive compliance** with all regulatory requirements.
- **Customer-centric design** for superior experience and engagement.
- **Fintech experience** - We are leveraging many years of Fintech experience. We conducted the first eCommerce transactions in the world through Digital Mall, and Yaron Assabi our CEO and founder, developed Hippo, Compare the market (UK), Blink by MiWay, and we have recently launched eInsurer cyber security and identity protection insurance.

3. INTRODUCTION

MVNE Pty Ltd is happy to submit this proposal, and we are willing to entertain several business models for this venture.

We are amid a major digital revolution dominating every sector of the economy. Enterprises now focus on enabling consumers, employees, and ecosystem partners. Companies no longer just serve customers; they collaborate with them. They no longer just compete with rivals; they partner with them. They are no longer limited by industry boundaries; they ignore them. In short: platform-based ecosystems are the new plane of competition.

MVNE (Pty) Ltd founded in 2013, pioneering the Mobile Virtual Network Enablement space in South Africa and the rest of the continent. MVNE is a wholly owned subsidiary of DSG (www.dsg.co.za) which allows our customers to tap into group resources and services as well as strategic partners.

This section outlines the strategic and operational framework for launching a GCT MVNO (Mobile Virtual Network Operator) in collaboration with MVNE. It highlights the advantages, potential market opportunities, strategic objectives, and structural requirements necessary for a successful MVNO launch.

3.1. What is an MVNO?

A Mobile Virtual Network Operator (MVNO) is a company that sells mobile services under its own brand while utilizing a host network's infrastructure. Key benefits include:

- Branded SIM cards
- Autonomy in creating deals, packages, and tariffs
- 4PL device management and support
- Independent customer care & billing
- Wholesale agreements with the host network
- No infrastructure investment required
- Direct ownership of the customer relationship

What is a MVNO?

The concept explained in more detail

3.2. Market Opportunity

The global MVNO market has experienced significant growth, increasing from \$42 billion in 2014 to \$65.68 billion in 2020, with an expected rise to \$109.9 billion by 2027. This demonstrates strong market potential for GCT to leverage its brand affinity and fan base.

Commented [HM1]: @Edward Wicks I think we should make this slide in their brand name

Commented [2R1]: Tx Hugo. Yes. All the slides will be changed and rebranded ;) Most are place holders.

3.3. Advantages of a GCT MVNO

1. **Enhanced Customer Engagement:**
 - a. Location-aware promotions and offers
 - b. Personalised brand messages and content
 - c. Zero-rated access to brand portals and websites
2. **Revenue Opportunities:**
 - a. Mobile data rewards linked to customer engagement
 - b. Monetisation of digital content
 - c. 4PL device management and support
 - d. Unique Value-Added Services
3. **Customer Insights & Retention:**
 - a. Data-driven customer value management
 - b. Personalised engagement strategies

3.4. Risks & Mitigation Strategies

- **Market Competition:** Careful pricing and customer-centric value propositions.
- **Operational Challenges:** Leveraging MVNE's expertise in operational and technical management.
- **Customer Acquisition & Retention:** Targeting a highly engaged customer base with exclusive offers.

4. STRATEGIC OBJECTIVES AND ASSUMPTIONS

Our Strategic Objectives for a MVNO

Strategic Objective		Description
	Non-traditional revenue growth	The addition of telecommunications revenue diversifies our overall revenue mix
	Driving core business revenue	Through the use of an MVNO initiate , GCT can drive the uptake and engagement with its brands
	Defensive positioning against disruption	Owning the telecommunications value chain unlocks your future ability to leverage digital channels for innovation
	Improved customer behavioral understanding	Passive data collection through ownership of the SIM card allows us to build rich data sets of consumer behavior (including location)
	Improved customer engagement	Through digital, we can improve our Customers' experience across all group companies
	Lower cost-to-serve through digital, improving profit	Customer self care, through digital channels and converged propositions allows us to lower the overall cost to serve

- **Target Market:** 3.7 million GCT customers
- **Acquisition Rate:** 7%
- **ARPU (Average Revenue Per User):** R75/month
- **Churn Rate:** 30%
- **Wholesale Rates:** As per attached appendix J

5. COLLABORATIVE OPERATING MODEL

A collaborative operating model

A strategic partnership

Through a collaborative approach, partnering with world class and supportive mobile network operators and enablers alike, Weaver Fintech would be in a position to create a sophisticated eco system **without having to build the skills or invest in the technology required.**

This approach serves to **limit the disruption of existing businesses**, accelerates time to market, **requires minimal integration**, **reduces the cost** and **improves the efficiency** of the overall operating model, leveraging the skills of existing players and benefitting from the economies of scale inherent in these existing businesses.

5.1. Partnership Structure

- **GCT Mobile:** Manages brand, marketing, and customer relationships
- **MVNE:** Handles MVNO operations, network partnerships, and day-to-day management
- **Host Network:** Provides infrastructure and related services

5.2. Operational Framework

- **Billing, CRM & OCS:** A single multi-tenant platform for efficient MVNO administration
- **Strategic Partnerships:** Collaboration with leading mobile operators to minimise cost and maximise efficiency.

5.3. Introduction Summary

This proposed MVNO presents a lucrative opportunity for GCT to engage its customers innovatively, generate new revenue streams, and establish a sustainable mobile brand. By leveraging MVNE's expertise, GCT can enter the telecom market with minimal risk while maximising brand engagement and financial returns.

Sell the experience

- Devices with finance options
- Merchant specials
- Buy and get airtime
- Buy airtime, get discounts and merchant/brand offers
- Drive app experience with unique offers for loyal GCT customers
- Create stickiness – Credit/debit cards/banking services
- eCommerce

- eSIM for tech savvy customers
- Protect your customers with McAfee security
- Travel eSIM for easy travel connectivity off your app.
- Loyalty rewards

Some examples of FinTech/Financial Services MVNOs

Brand (Country)	Logo (Click to visit)	Status/Scale highlight
FNB Connect (ZA)		~971k active SIMs around FY2024/25
Standard Bank Connect (ZA)		300k+ customers; eSIM rollout plan
Capitec Connect (ZA)		Launched 2022; claimed largest SA MVNO by Feb-2025 - over 2 million customers today
Equitel (Kenya)		First African MVNO with 5G; rising mobile-money share
La Poste Mobile (FR)		~2.3M customers; acquired for €950m (2024)
Rakuten Mobile (JP)		eCommerce company started MVNO in 2014; moved to MNO build-out from 2018

More examples of banking/fintech led MVNOs:

Europe

- **PosteMobile (Italy)** — MVNO of postal-banking group Poste Italiane; one of Italy's largest MVNOs, with multi-million subscriber base and consistent growth in 2024/25 results. posteitaliane.it
- **Bankinter Móvil (Spain)** — Early bank-led MVNO case (now discontinued) that showed the model's viability in Spain's MVNO boom era and provides historic lessons on pricing/segmentation. [Mobile Monday](https://mobilemonday.com)

Russia & CIS

- **SberMobile (Russia)** — Sberbank's MVNO; rapid scale-up to ~3.8 million subs by mid-2025, now operating across multiple host networks (T2/Tele2 and MegaFon). Ecosystem rewards (banking/loyalty) fuel growth. sbermobile.ru+2telecompaper.com+2
- **Tinkoff Mobile / "T-Mobile" (Russia)** — Full-MVNO integrated with Tinkoff's digital bank; nationwide footprint using Tele2 RAN, recognized for innovative plans and digital onboarding. broadforward.com+1

East Asia

- **KB Liiv M (South Korea)** — KB Kookmin Bank's MVNO; ~430k subs and member of Korea's MVNO association by March 2025; leverages bank's Liiv super-app and bundled incentives. biz.chosun.com

- **Toss Mobile (South Korea)** — MVNO of fintech “super-app” Toss (Viva Republica). Launched 2023 with **150k pre-registrations**, cash-back on unused data, and tight linkage to Toss Pay/Bank/Securities. samenacouncil.org+2thepickool.com+2
- **Woori WON Mobile (South Korea)** — Woori Bank’s budget MVNO brand launched April 2025 in partnership with LG U+; bundles generous joiner incentives and bank tie-ins. biz.chosun.com+1

Latin America

- **NuCel by Nubank (Brazil)** — MVNO announced/rolling out with **Claro** as host; taps Nubank’s enormous customer base and app-centric activation via eSIM.

Value Proposition for MVNE / New MVNOs:

- Leverage existing customer base + app to lower customer acquisition cost (CAC)
- Bundle telecom + loyalty value (rewards, data perks, app integration) for stronger retention
- Use digital onboarding (eSIM, app KYC) to reduce friction
- Choose a host MNO or enablement partner optimised for cost-effective scale
- Consider bank/fintech ecosystem synergy (payments, loans, data) to drive cross-sell and stickiness

5.4. Take-aways

Brands already possess high-trust customer relationships, strong data assets and distribution channels. By adding a telecom layer (via MVNO), they create a “slice” of wallet, deepen user engagement and open new revenue streams — especially when enabled via digital onboarding + rewarding usage. The above cases demonstrate that models work across geographies.

6. THE DSG DIFFERENCE

The Digital Solutions Group has been in operation in South Africa for more than 25 years servicing a multitude of customers. We partner with our customers to build comprehensive solutions, which innovate business relationships to yield mutual return on investment. Our people and diverse technology enable access to products and services anywhere, anytime, ensuring a customer centric focus.

Through a comprehensive selection of partners, DSG offers several ancillary services and continues to identify and add additional services to provide a full turnkey solution for customers, and most certainly for MVNO partners.

6.1. DSG Service model partners

MVNE and DSG are committed to the success of your MVNO and thus provide several additional optional and supporting services which have been identified over the years to help ensure the success of the MVNO:

1. World Class CX
2. Customer Value Management
3. Marketing as a Service
4. eCommerce
5. 4PL
6. Identity management
7. Cyber security

6.2. World Class Integrated Customer Experiences

CXG (www.cxg.co.za), part of DSG serves some of the largest brands in Africa. In Telco we have clients like DSTV Internet, Vuma, Afrihost, PepCell, Web Africa and many more.

We recently won the best CX Team in South Africa at the CEM Awards 2025 with Nando's, and we were also awarded the Best Support Service Provider 2025.

We are super proud of this award because Nando's has been our client for 25 years and we are the only South African company to win such a prestigious award. The unique solutions we designed, and youth employment opportunity created by #DoingSomethingGreat with Nando's as can be seen from the enclosed video <https://www.youtube.com/watch?v=2OImWh1Wc2Y>, it has made a significant impact and social contribution to the African economy.

The key to our offering and differentiation is our commitment to true Empowerment. We are proud of our partnership with the Maharishi Institute, which significantly expands our Contact Centre capacity and further supports our sustainable 'learn-and-earn' approach with unemployed students in Africa.

We are a Level 2 BBBEE service provider, as a business, we have always advocated that DSG stands for 'Doing Something Great' and this partnership provides you with unique platform to positively impact students and communities.

CXG provides omni channel customer care which can directly service and benefit the MVNO. With a track record spanning 25 years, we remain a leading South African On-Demand Integrated Customer Experience provider serving over 100+ premier and larger corporate brands.

We possess the skills, experience, and industry expertise to offer a comprehensive on-demand and fully managed Contact Centre solution that cost effectively provides:

- The implementation of complex customer experiences strategies underpinned by robust, economic, and scalable technology solutions.
- The identification of and reporting on bespoke critical success factors and performance indicators.
- Comprising balanced sets of metrics that support customer value with associated customer focused processes.
- The consistent provision of a seamless customer experience across omni channels.
- Consistent delivery against our EEQ framework which focuses on meeting your Efficiency, Effectiveness and Quality Targets.
- True On-Demand scalability where our People, Process and Technology seamlessly scale to meet the demand requirements per hour, day, week, and month.

Key to our offering and differentiation is our commitment to true Empowerment. We are proud of our partnership with the Maharishi Institute, which significantly expands our Contact Centre capacity and further supports our sustainable 'learn-and-earn' approach with unemployed students in South Africa.

As a business, we have always advocated and stand for 'Doing Something Great,' and this partnership provides us with a unique platform to positively impact students, communities, and impact lives. To this end we have over the course of the last six (6) years managed and deployed our model with large listed corporate local and global brands where we have managed over R1,6 billion in sales and over 6 million calls utilising both core Contact Centre agents and services, underpinned with trained Student Contact Centre agents that support demand with our educational pipeline and supply.

"CEO, Brandon Meszaros through this partnership with the Institute we have designed a business model that not only offers significant benefits, including delivering exceptional quality customer service and improved BEE benefits, but it also creates a safe environment where students can earn while they are learning."

"Our focus at the Maharishi Institute is to offer an effective learn-and-earn program for bright young minds, who, despite their historically disadvantaged backgrounds, have the right attitudes towards learning – and recognize the role their education can play in not only their own upliftment but that of their families and communities too."

As the venture operates as a business, it empowers us to generate funds and help create long-term sustainability for the Institute – which in turn will enable us to expand our footprint and reach more youth and change their lives through education.

Through the establishment of our Omni-Channel Contact Centre, and the business it will attract, the Institute has set a target of being able to grant access to education for 1,000 students to enter higher education by its next intake and further supports our Elevate "Learn to Earn" program which, in turn provides the ability to leverage skilled students, whom are on a four (4) year path, to truly meet demand cycles whilst doing something great by changing people's lives.

We are committed to delivering exceptional customer experience. Our unique range of solutions encompasses Omni-Channel support, CX, Customer Care, Social Media Engagement, IT Service Desk and Management, Contact Centre services, Workforce Management, Dynamics CRM, Cloud Solutions, Business Intelligence, and deep domain insights.

With us as your partner, we are confident you will transform your customer experience, driven by our proven strategies whilst achieving unparalleled CSAT and NPS success.

Omni-Channel Support: Deliver seamless customer interactions across multiple channels with our Omni-Channel support solutions. We integrate voice, chat, email, social media, and self-service options into a unified platform, providing a consistent and personalized experience. By embracing our Omni-Channel capabilities, you can engage customers on their preferred channels, increase customer satisfaction, and foster long-lasting relationships.

CX (Customer Experience): Enhance your customer journey with our Digital CX solutions. We help you map out and optimize every touchpoint, ensuring a seamless and memorable experience for your customers.

Through data-driven insights and customer feedback analysis, we identify pain points and implement strategies to improve customer satisfaction, loyalty, and advocacy. Our CX solutions empower you to build stronger customer relationships and drive business growth.

Customer Care: Deliver exceptional customer care with our comprehensive range of solutions. From multilingual support and 24/7 availability to SLA adherence and customer satisfaction measurement, our Customer Care offerings are designed to exceed customer expectations. We help you build a customer-centric culture and deliver personalized experiences that enhance brand reputation and increase customer loyalty.

Social Media Engagement: Harness the power of social media to connect with your customers on a deeper level. Our Social Media Engagement solutions enable you to monitor, engage, and respond to customer conversations across various social media platforms. We help you build a strong social media presence, manage your brand reputation, and turn social interactions into positive customer experiences.

IT Service Desk and Management: Streamline your IT support operations and improve efficiency with our IT Service Desk and Management solutions. We provide end-to-end IT support services, including incident and request management, proactive problem resolution, and ITIL-aligned processes. With our expertise, you can optimize IT resources, minimize downtime, and deliver seamless technology support to your employees and customers.

Contact Centre Services: Elevate your contact centre operations with our Contact Centre services. We offer a range of solutions, including inbound and outbound voice support, email management, chat support, and self-service options. Our contact centre solutions enable you to deliver exceptional customer experiences, improve first-call resolution rates, and drive operational efficiency.

Workforce Management: Optimise your workforce with our Workforce Management solutions. We help you effectively forecast customer demand, schedule agents, and manage staffing levels to ensure maximum productivity and customer satisfaction. Our workforce management solutions enable you to align resources with demand and drive operational excellence.

Dynamics 365: Leverage the power of Dynamics 365 to enhance customer relationships and drive business growth. Our solutions enable you to streamline sales processes, improve customer engagement, and gain a 360-degree view of your customers.

Cloud Solutions: Embrace the agility and scalability of the cloud with our Cloud Solutions. We offer secure and reliable cloud infrastructure, enabling you to enhance operational efficiency, reduce costs, and scale your operations as needed. Our cloud solutions empower you to leverage the latest technologies, streamline processes, and deliver seamless customer experiences.

Business Intelligence and Deep Domain Insights: Make data-driven decisions with our Business Intelligence and Deep Domain Insights solutions. We combine advanced analytics, data visualization, and industry expertise to provide actionable insights into your business performance. From operational efficiency and workforce optimization to customer behaviour and market trends, our solutions enable you to unlock hidden opportunities and drive strategic growth.

We have extensive CX experience with our experience demonstrating our CX Support for large organisations across UK, Australia, New Zealand, US, Canada, India, Kenya, Nigeria, Mauritius, Ghana, Botswana, Uganda, Angola, Lesotho, Zimbabwe, Tanzania, Reunion, Namibia, Eswatini, Mozambique, Ivory Coast, Gabon, Sudan, Zambia, Senegal, Madagascar, Malawi, Rwanda, India, Bahrain and Qatar supported from South Africa. This includes our extensive experience on the African continent that speaks to CX and large-scale Call Centre deployment.

Our experience extends further with our focus on supporting a key client across our commitment to service excellence and delivery, whilst remaining flexible, adaptive, and responsive.

6.3. Customer Value Management (CVM) with Xanite

In Support of our MVNO partners, it has become clear that extracting value from the customer base and enhancing their personal engagement with the MVNO is intrinsically linked to the success of the MVNO. As such, we have introduced Customer Value Management to support the growth of your MVNO. This is particularly relevant as the base grows, and one wishes to engage further with the end subscriber

6.4. Marketing as a Service

We also offer “performance marketing” business models and Value-added services through sister DSG company Broadbrand (www.broadbrand.co.za) like CPA, CPI, CPD, and our data science team helps with business intelligence across the total business to maximise efficiency and mitigate risk.

DSG is a member of the IAB (Interactive Advertising Bureau www.iabsa.net) and MMA www.mmglobal.com and we ensure that all campaigns are based on best practice from the two organisations and we comply with their standards.

At Broadband our Marketing as a Service business, we understand the pivotal role marketing plays in the success of any venture, especially in the highly competitive telecommunications industry. As your strategic partner, we offer a suite of innovative services designed to empower your MVNO launch and drive sustainable growth. Through the fusion of human expertise and cutting-edge AI technologies, we deliver exceptional marketing solutions at the speed of technology, propelling your brand to new heights.

AI-Driven Strategy Development

In the ever-evolving landscape of telecommunications, a solid marketing strategy is paramount. Leveraging advanced AI analytics, Broadband evaluates your current marketing strategies and aligns them with your MVNO's business objectives. By harnessing the power of AI, we identify opportunities and optimize your marketing plan for maximum impact, ensuring every strategy is data-driven and highly targeted to your audience's needs and preferences.

Content Creation Powered by AI

Compelling content is the cornerstone of effective communication with your target audience. With our AI-powered content creation tools, Broadband assists in crafting tailored messages that resonate deeply with your audience, driving engagement and conversions. From automated content generation to sentiment analysis, our AI ensures your brand voice remains consistent and impactful across all channels.

AI-Enhanced Digital Advertising

In today's digital landscape, precision targeting is key to successful advertising campaigns. Broadband harnesses the power of AI to refine ad targeting and budget allocation, ensuring your digital ads reach the right audience at the right time. By analysing user behaviour and market trends, our AI algorithms optimise ad placements, maximizing your ROI and driving revenue growth for your MVNO.

There's never been a more complex time to be a marketer who is addressing a vast audience, both digitally and otherwise. The competition in the mobile market requires a unique CVP and executing the right campaign for the customers is essential.

MVNE has developed Xanite to offer a full CVM (Customer Value Management) solution including campaign design and management, customer journey orchestration, audience segmentation, recommendation and personalisation using artificial intelligence and machine learning to offer a comprehensive "marketing as a service" solution for our MVNO customers.

We recognise that every customer's needs may be different and a 'one-size-fits-all' approach may fall short of what you have set out to achieve. This is where we offer you an advantage! Our contextual

marketing solutions harness the power of data to create unique, impactful strategies for you, bringing you results and satisfied customers.

AI persona targeting, enabling you to leverage AI that understands your personas, and how and where to target them.

“Your contributions have been nothing short of exceptional in every regard, and the commitment from the team is unparalleled. I often have to remind myself that this is our product and not yours, given the ownership your team has demonstrated throughout. I know we haven’t been the easiest client and have dropped the ball here and there; but MVNE has been our safety net each time, never missing a beat”

We leverage powerful marketing technology and enablement partners to deliver world-class results

SEO and SEM with AI Insights

Visibility in search engines is crucial for brand awareness and customer acquisition. Broadbrand integrates AI technologies to streamline SEO and SEM efforts, from automated keyword research to

predictive analytics for trend spotting. This results in smarter, more effective search engine strategies that elevate your MVNO's visibility and organic reach, driving traffic and conversions.

Social Media Management with AI

Social media has become a cornerstone of modern marketing strategies. Broadband's AI tools monitor social media trends and audience engagement in real-time, allowing for dynamic strategy adjustments. By staying ahead of the curve, we ensure your social media presence remains vibrant, relevant, and closely aligned with audience preferences, fostering deeper connections with your customers.

Analytics, Reporting, and AI Tools for your marketing team

In addition to providing comprehensive analytics and detailed performance reports through AI-driven insights, Broadband offers AI marketing tools for resale. This empowers your MVNO to leverage the same advanced technologies we use, ensuring continuity and efficiency in your marketing efforts as you scale and evolve.

We stand ready to support your MVNO launch with our innovative marketing solutions. By harnessing the power of AI, we will elevate your brand, drive growth, and achieve your marketing goals in the dynamic telecommunications market. Let us embark on this journey together and unlock the full potential of your MVNO.

Our digital MVNO enablement program provides a full suite of capabilities required to launch and manage your digital MVNO. We are here to help you get up and running quickly, successfully, and at reduced risk.

- Sales and marketing enablement program
- Expert launch management personnel
- Business and financial planning and budget setting
- Wholesale MNO planning and contracting
- Product and service design
- Technology platform selection and integration
- Branding and associated assets
- Customer service strategy and implementation
- HR, hiring and training

Following a successful MNO contracting process your MVNO can launch in as little as 2 months, with full confidence, and for a fraction of the cost of a traditional MVNO operating and distribution model.

Below you will see a sample marketing plan.

A framework for sales and marketing enablement.

sales & marketing enablement program process

Our program is modular; we work with you to identify capability needs and build a highly targeted program to drive a successful outcome. Post-launch, we hand the operation over to your business-as-usual team, or we can even continue to manage the operation on your behalf - the choice is entirely yours.

In Summary DSG & MVNE can help GCT Mobile supercharge brand recognition, reduce time to launch, simplify hiring and organisational set up and therefore reduce operating risk, maximise net adds and long-term EBIT, reduce overall investment and leverage a proven model.

MVNE has been working with MTN over several years on various projects including the first MVNO integration into EBU in 2016, which resulted in MVNE nomination and "Thrive award for MTN Innovation Partner of the Year."

Projects in 6 Territories

MTN Collaborative Partner since 2015

2013
Founded in January 2013

MVNE uniquely provides a comprehensive integrated service to all levels of MVNO's across the entire MVNO value chain from initial concept, strategy design, full customer value proposition design, and commercial viability, as well as *Go To Market* strategy and implementation. We offer managed services to the MVNO as well as a "pay as you grow" or "shared risk and success model" and sometimes even invest.

MVNO Projects across Africa

MVNE has had projects in 8 African territories, supporting Financial Services Providers, Broadcasters, ISPs and Retailers

digitalmall.com

We integrated our platforms to www.digitalmall.com (a member company of DSG), and we can very quickly and efficiently set up a full Omni-Channel commerce solution for our MVNO customers.

Our dedication to the customer and operational excellence ensures we provide an unparalleled level of service, maximising the success rate in all our engagements. We integrate leading-edge digital solutions that deliver measurable results in an always-connected digital landscape. DSG enables businesses to optimize how they serve their customers, adapt to new market realities, and embrace digital transformation. Translating innovation into value creation, DSG is renowned for its pan-African

presence and reputation for delivering a world-class customer experience. We have extensive experience and the legacy of 25 years of service excellence.

DSG SERVICE MODEL

We have been doing supply chain management and logistics management (4 PL) since 1998 for Digital Mall customers, so we have extensive experience in this sector. Through Ufreight (a member company of DSG) we assist our MVNO customers with the strategy for their full supply chain management solution; from sourcing devices; warehousing devices in a bonded warehouse; to last mile delivery which includes the full RICA process and a closed loop management process for compliance to POPI through www.optional.me.

“Digital Identity is one of the cornerstones of the digital economy” Juri Rates, PM, Estonia.

We set up Optional.me in partnership with TransUnion & Contactable (the company that MTN uses for its RICA platform) to offer a complete identity management solution.

We assist our customers to onboard quickly and manage the consent and permission marketing with easy-to-use tools.

Organisational Challenges we solve together

We offer MVNO's an integrated cyber resilient approach to protecting their digital environment, Digital Resilience founded in 2018 is strategically aligned to globally renowned, best-in-class IT, Network, and Behavioural Cybersecurity partners enabling our clients to respond to modern cyber warfare. Digital Resilience makes use of SaaS-based and fully managed services including threat detection, managed security operations, education, awareness, simulated training, and risk assessment.

Digital Resilience offers a comprehensive suite of solutions that ensure business continuity in the face of adverse cyber threats.

MVNE is technology agnostic and has multiple technology partners that are available to cater for different maturity levels of MVNO's and their business requirements.

LUMINE

We partnered with the Lumine Group (www.lumine.com), a leading global acquirer of communications & media software businesses with + \$49 Billion market capitalization.

Lumine Group architects the future of connectivity in the communications and media industry by introducing businesses to an ecosystem with access to a network of global, like-minded professionals, customers, and partners. Lumine Group is a division within Volaris Group, a subsidiary of Constellation Software Inc (TSX: CSU).

Global Portfolio of Companies

pharos

AVANTGARD

MVNE partnered Pharos Avantgard to provide our MVNO customers with their USSD, SMSC, PCRF and integration services as and when required as well as CIG for CAMEL and IN integration.

Pharos Avantgard is a supplier of advanced telecommunications products with a clear mission: To constantly improve our customer's ability to compete.

Since 2000, Pharos Avantgard has remained true to this path through the development, deployment, and support of efficient, cost-effective, and commercially relevant technology. Pharos deliver value beyond any doubt. The software products span ready-for-market offerings and tailored services designed to complement existing infrastructure. Pharos delivers real-time efficiencies and enhances our clients' ability to generate revenue. All their solutions walk the fine line between innovation and relevance. The underlying proprietary technology ensures that our clients can operate better and faster for less. With major clients in South and East Africa and parts of Europe, Pharos ably demonstrates the power of organic development in live environments. Twenty years in the industry and numerous satisfied multinational clients are testaments to the efficacy of their products and practices.

MVNE partnered with Flolive (<https://folive.net/>) to provide an IOT platform for our MVNO customers. Flolive **were awarded the largest IOT project on the continent providing +20 million eSim's for the Multichoice connected decoder project.**

The global IoT market finds itself at an interesting standpoint right now with the recent introduction of licensed LPWAN technologies such as NB-IoT and LTE-M has driven new services as well as business growth opportunities that will only intensify with the addition of 5G over the coming months.

Out of these opportunities, Service Providers will be asked to handle new IoT business models that have not been available in the market. New billing capabilities will need to allow multi-tenancy, unified invoicing and extended capabilities that will enable us to provide new products and services.

MVNE & FloLive's strategy is to help you meet the IoT market's future needs, by providing advanced solutions and services to customers. We will focus on demonstrating how our partnership will benefit GCT Mobile MVNO by offering:

- I. **Elastic Architecture** - Advanced microservices architecture provides the choice of cloud, on-premises or tailored hybrid deployments that scale as you grow.
- II. **Open and Integrative** - Advanced, unified REST API suite enables seamless integration with any legacy platform to streamline business operations.
- III. **Creative Business Models** - Built to handle both Low and High ARPU business models, all services are based on a transparent, pay as you grow model with low TCO expanding revenue growth beyond just connectivity.
- IV. **Multi-layered Security** - Inherent, uncompromised security from multiple angles protects both devices and data against cybersecurity threats.
- V. **Regulatory Compliant** - Adheres to privacy regulations such as GDPR and fully complies with roaming restrictions, local regulations, and data laws.
- VI. **Quick Time-to-market** - With a software-based, fully integrated virtual platform, remote installation is done in weeks(!), allowing fast provisioning of new services.
- VII. **Service Automation** - Fully automated service platform reduces human intervention and increases productivity and profit.

To start the service at no time with minimal cost, MVNE & Flo LIVE can offer an existing platform that is already integrated with MTN SA with a local Packet Gateway installed in MTN data center.

MVNE partnered with **Globetom for the ORCHA™ iPaaS Integration Platform and CSP BSS solution applications** based on the **TM Forum Open Digital Architecture approach** as well as an **API-First approach** primarily based on TM Forum Open APIs.

Since inception in 2002, Globetom has provided ICT platforms and solutions in the telco/CSP domain. They have solution deployments across the globe in the US, UK, UAE, Africa, Japan, and New Zealand. Locally MTN SA is their largest customer for whom we have supplied the IBF solution, recently renamed STACLEO, for the provisioning of mobile services since 2002.

Globetom's strategy and focus is to implement platforms and solutions which are telco grade in terms of real-time performance, resilience, and scalability and which are highly configurable and

customizable, allowing low-to-no code implementations. Their aim is to enable partners and customers to build solutions on these platforms using configuration and little to no code, which makes our time to market much quicker and our solution more cost-effective. For example, the BSS integration to MTN (SOA & API) is already existing in our iPaaS and therefore is a “0 “code component which can be reused for future MVNO deployments.

Globetom has industry leading data migration and system integration skills that are critical success factors for all MVNO’s.

For MVNO’s, personalised customer experiences provide pathways to increased customer satisfaction, improved customer retention and revenue growth by sharing appropriate opportunities to buy (including cross-selling and up-selling).

We are fully compliant with all the RFP requirements and in fact provide solutions and services that were not requested in the RFP, however in our opinion they are essential for the success of MVNO’s.

Our methodology and flexibility have ensured a 100% success rate for MVNOs and produced projects across 6 countries to date in Africa.

“We keep it **SIMPLE**”

With exclusive pan Africa distribution rights, we can create GCT mobile bundles that include mobile devices and PC protection, with a unique family proposition to help keep customers and their families secure in a world rife with cyber security issues.

McAfee Multi Access – Product Features

McAfee® Multi Access

All-in-one protection in the palm of your hand for everything you do online.

McAfee® Multi Access is a single, simple solution that protects your personal data and privacy, everywhere you go.

Get antivirus, safe browsing, secure VPN, identity protection, and more in all-in-one easy-to-use app, so you can connect with confidence whenever and wherever you access the internet.

Identity Protection (Dark Web Monitoring)¹

Stay in control with personal identity monitoring and timely alerts, with guidance on how to fix compromised information.

Secure VPN

Help keep your personal data, online activities, IP addresses, and physical locations private from prying eyes, even when you're connected to a public Wi-Fi.

Wi-Fi Scan

Timely alerts when attempting to connect to an unsafe network so you can choose a different network or turn on your Secure VPN.

Safe Browsing

Browse confidently knowing that we're keeping you safe from risky websites and threats.

Antivirus (Android only)

Backed by our McAfee Global Threat Intelligence, our real-time scanning keeps your Android device safe from mobile malware.

System Scan (iOS only)

Scan your device's software to ensure it is up to date to protect it from the latest threats and viruses.

Product Flow Diagram

Empowering people to **freely**
and **confidently** enjoy life online.

#DoingSomethingGreat

Travel eSIM opportunity

eSIM

An eSIM is a tiny, built-in chip in your phone that can hold multiple mobile plans digitally (no plastic SIM).

Travel eSIM

A travel eSIM is a short-term mobile data plan you buy online for the country/region you're visiting. You scan a QR code (or use an app), the plan downloads to your phone, and you're online when you land.

♥#DoingSomethingGreat

Leverage relationships around travel
– Airports, Airlines, Booking sites, Travel agents to leverage booking flow, app, email, airport signage, inflight tv, inflight mag, QR code on each seat back, boarding passes

Economics:
+\$3–\$7 ARPU uplift, attach rate 3–7% within 12 months

♥#DoingSomethingGreat

GCT-branded, customer co-branded itinerary-aware travel eSIM with loyalty

♥DoingSomethingGreat

DSG digital
INSURANCE GROUP

Why Travel eSIM?

Cheaper:
Local/regional data rates are typically far lower than home network's roaming prices.

Faster:
Connect to local networks directly, often with better speeds/latency than roaming partners.

Instant setup:
No shop visit; buy and activate before or after you fly.

Keep your number:
Run dual-SIM—use the travel eSIM for data while home SIM stays active for calls/OTP texts (banking, WhatsApp).

Flexible:
Swap plans easily, add more data, or change countries with regional eSIMs.

No bill shock:
Prepaid data with clear allowances; usage is easy to track in the app/settings.

♥DoingSomethingGreat

DSG digital
INSURANCE GROUP

From identity theft to smart contract exploits, cyber threats are now personal, pervasive, and global. Insurance hasn't kept up, until now. eInsurer as a DSG company has developed targeted insurance products, which are available on a revenue share basis as a VAS offering.

Specialised Capability Powers Each Product Line

Corporate Cyber & Crypto Insurance

Digital Resilience (DSG company)
Cybersecurity infrastructure, software licensing, and managed SOC services

CXG
24/7 global technical support and incident response desk

Crypto Wallet Insurance

Circuit

- Real-time wallet protection and key loss prevention
- Automatically migrates funds to a backup wallet during attack conditions

Innerworks

- Large-scale bot detection and suppression
- Secures wallet UIs, login endpoints, and transaction flows from automated attacks

Underwriting Partners

iTOO Special Risks

Local underwriting and product structuring

Hollard Insurance

Licensed South African insurer enabling regulated product rollout

Munich Re

Global reinsurance backing for scaling coverage capacity and actuarial confidence

Personal Identity & Cyber Insurance

McAfee

- Embedded distribution through McAfee Individual and Family plans
- Endpoint-level risk intelligence and security telemetry

Why It Matters

Global-grade underwriting + real-time tech = insurability at digital speed

Ensures both regulatory compliance and parametric payout reliability

Partners enable us to launch, price, and scale each product line confidently

VAS =
Revenue + Differentiation + Retention

Strategic Outcome	VAS Enablers
 New Revenue Streams	Insurance, OTT, Cloud Storage, Security, eSIM
 Customer Stickiness	Loyalty Programs, Device Financing, Safe Family
 Higher Margins	Digital-only delivery, low support cost
 Brand Differentiation	Tailored bundles, segment-specific CVPs
 Lower Churn	Relevant services = stronger daily/weekly use

DSG customer showcase

Below is an illustration of some of our customers from different market segments:

Partnering with DSG & MVNE offers a unique opportunity to gain a dominant head start for your business. We are here to help you beat your competition.

It is our privilege to humbly present this comprehensive response to the GCT RFP, and we look forward to working with you

Yours Sincerely,

Yaron Assabi

Founder & CEO

Mobile Virtual Network Enabler

7. SCOPE OF WORK

This section provides a comprehensive, requirement-by-requirement response to GCT, demonstrating how MVNE (Pty) Ltd will deliver both a Full MVNO and/or a Digital Mobile (MVNO Light) solution. Each requirement is addressed in detail, referencing our proven platform capabilities, operational experience, and alignment with GCT's strategic objectives.

7.1. Full MVNO solution

7.1.1. SIM Lifecycle Management & Provisioning

- Bulk and individual SIM provisioning (ordering, allocation, activation)
- Support for eSIM and physical SIM
- SIM swap, replacement, blocking, porting
- Churn management
- Real-time stock reporting and inventory management
- Multi-channel SIM distribution (courier, in-field, digital)
- SIM security compliance and tracking
- Integration with third-party distribution partners

MVNE's platform provides end-to-end SIM lifecycle management, supporting both eSIM and physical SIMs. Bulk and individual provisioning is managed via a secure, web-based portal, with full audit trails and inventory tracking. SIM swap, replacement, blocking, and porting are standard features, fully compliant with RICA, POPIA and ICASA regulations.

- **Churn management** is enabled through real-time analytics and automated workflows and service automations.
- **Distribution:** Multi-channel options include courier, in-field agents, and digital eSIM delivery. SIM distribution is supported by the SIM Stock management, sales and distribution portal.
- **Security:** All SIMs are tracked via unique identifiers, with compliance reporting and integration to third-party logistics partners for seamless fulfilment.

Inventory Management Portal

7.1.1.2. Account Management

- End-user account creation, upgrade, suspension, blocking, closure, re-activation
- Login/password administration
- User-to-multiple SIM linkage
- Account hierarchy management (family/business)

Our solution supports the full lifecycle of customer accounts, including creation, upgrades, suspensions, and closures.

- **Multi-SIM linkage:** Users can manage multiple SIMs under a single account, ideal for families or businesses with a corporate account-based structure.
- **Account hierarchies:** Corporate and family structures are supported, with delegated administration and reporting.
- **Security:** Robust authentication, password management, and GDPR/POPIA compliance are standard.

7.1.3. Product and Bundling Management

- Comprehensive product catalogue (voice, data, SMS, airtime, bundles)
- Customisable bundles (1, 7, 14, 30-day validity)
- Dynamic pricing and promotions
- Subscription management and automated renewals
- Reward bundles and loyalty integration

MVNE's product catalogue is fully configurable, supporting all standard and custom bundles.

- **Validity periods:** Bundles can be set for any duration, with automated expiry and renewal.
- **Promotions:** Dynamic provisioning and promotional campaigns are managed via the platform's campaign engine.
- **Subscription management:** Subscription management can be done through the App / Web or Customer care and provision can be done based on payment management.
- **Loyalty:** Integration with GCT's rewards and loyalty programmes is supported via open APIs.

7.1.4. Activity and Recharge Management

- Airtime/data management and redemption
- Auto-issuance for recurring services
- Multi-channel recharge (retail, USSD, digital)
- Real-time balance and usage tracking

- Integration with GCT payment infrastructure

Our platform enables real-time management of airtime and data balances, with redemption and auto-issuance features for recurring services.

- **Airtime/data management:** Airtime and data can be managed through the App or portal and dynamic amount or value allocation is possible.
- **Auto-issuance:** Any products including insurance or security products like McAfee provisioning can be added to the subscriber payment or onboarding flows with workflow management and integration to the different systems.
- **Recharge:** Customers can top up via retail, mobile app, or web portal and convert airtime to voice, data or SMS via USSD. Conversion of loyalty to Voice, Data and SMS can also be done.
- **Real-time balance:** Direct view of available balances is available to the subscriber through the App, USSD or Portal and to the MVNO through the MVNO portal.
- **Integration:** Connection to GCT's payment systems ensures seamless customer experience.

7.1.5. Event and Notification Management

- Real-time notifications (recharge, SIM swap, activation, blocking, churn)
- Service depreciation alerts
- Custom event integration
- Multi-channel delivery (SMS, email, push)
- CRM and marketing system integration

All key customer and network events trigger real-time notifications, delivered via SMS, email, or push.

- **Custom events:** The platform supports custom triggers and integration with internal events and external CRM/marketing systems for campaign automation.

7.1.6. Value-Added Services (VAS) Platform

- SMS/MMS, voicemail, device management (OTA), WASP gateway, USSD, WhatsApp, airtime advance, loyalty, API extensibility

MVNE provides a comprehensive VAS suite, including:

- SMS/MMS, voicemail, device management (OTA updates), WASP gateway, which is made available through the MNO, MVNE also has its own USSD menu management, WhatsApp integration, airtime advance, and loyalty management solutions which can be taken advantage of.
- **API-first:** All VAS are accessible via open APIs for extensibility.

7.1.7. Billing and Financial Management

- Prepaid and subscription billing
- Automated invoices and itemised billing
- Monthly statements
- Credit/debit operations
- Revenue recognition and reconciliation
- Optional international roaming and billing
- Integration with GCT financial systems

Our converged billing platform supports both prepaid, postpaid and subscription models, with automated invoicing, statements, and reconciliation.

- **Credit/debit operations:** Credit and debit operations are enabled through the integration with the payment service and can be accommodated in the billing platform for record.
- **Revenue recognition and reconciliation:** Revenue recognition and reconciliation against the MNO billing and recognition as per usage is done in the reporting as part of the MARS solution which includes Mediation, Assurance, Revenue and Service automation.
- **International roaming:** Available as part of the MNO offering as well as an independent eSIM roaming solution via the App.
- **Integration:** Direct interfaces to GCT's financial systems for seamless reporting.

7.1.8. Regulatory & Compliance

- Full RICA/eRICA compliance
- Number portability
- Lawful intercept
- Depreciation notifications and compliance reporting

MVNE is fully compliant with RICA and eRICA, with automated workflows for subscriber verification and reporting.

- **Number portability:** Supported via integration with the national CRDB.
- **Lawful intercept:** Platform supports all regulatory requirements for lawful intercept and compliance notifications through the operators. Full audit functionality is also available on all platforms to ensure compliance with data protection and tracing requirements.

7.1.9. CRM and Administration

- Advanced reporting and analytics
- Cohorting and segmentation
- Integrated messaging

- Campaign management
- Customer journey tracking

Our CRM suite provides advanced analytics, customer segmentation, integrated messaging (SMS, email, push), campaign management, and journey tracking.

- **Dashboards:** Real-time dashboards for customer engagement and campaign performance.

Advanced Reporting and Analytics: MVNE has the Xanite and PersaIC platforms that have full analytics and segmentation capabilities which as part of the customer journey management and tracking has integrated messaging to the customer through in App, SMS and or email.

The screenshot shows the 'Create New Segment' form. It includes fields for 'Segment Name', 'MVNO', and 'Client'. There is a dropdown for 'Event Type' set to 'Any' and a slider for 'Days of Activity' set to 30. Below these fields, there is a link to 'Show Advanced Options'. Under 'Choose a Bucket Distribution', there are six options: '100% Single Bucket' (All users in one group), '90/10 Split' (Standard campaign with 10% control group), '80/20 Split' (More room for testing with a 20% control group), '2 Buckets, Equal' (Used for balanced A/B), '3 Buckets' (For comparing multiple), and '40/30/10 Split' (Test across priority).

7.1.10. OSS/BSS

- Online Charging System (OCS)
- Network Operations Centre (NOC)

- Enterprise Product Catalogue (EPC)
- Accounting/provisioning
- Performance dashboards

Response:

MVNE's OSS/BSS stack includes a real-time Converged billing with OCS and Billing platforms, EPC for flexible product configuration, and comprehensive accounting/provisioning systems.

- **NOC with SLA management:** MVNE has full monitoring and sla reporting in our NOC with additional Metrices for analysis and fault tracking.

- **Dashboards:** Customisable performance dashboards for operational oversight.

7.1.11. Support & Service Desk

- 2nd/3rd level support
- Dispute management and escalation
- Knowledge base and self-service
- Integration with GCT customer service
- 24/7 technical support

We provide multi-level support, with 24/7 technical assistance, dispute management, escalation procedures, and a knowledge base with USSD and in App / Web self-help services and capabilities.

Below example of the ticket tracking:

- **Integration:** Direct integration with GCT's customer service infrastructure for payments and customer management is possible.

7.1.12. Portal Management

- Web portal with role-based access
- Authentication and authorisation
- Data extraction and reporting
- Real-time dashboards
- Mobile-responsive design

Our web portal offers secure, role-based access, advanced authentication, data extraction, real-time dashboards.

7.1.13. Miscellaneous Services

- Zero-rating nomination and management
- SIM WASP double opt-in
- Integration with external partners
- API-first architecture

Zero-rating, SIM WASP double opt-in, and external partner integration are all supported.

- **API-first:** All services are accessible via secure, documented APIs. And integration with external partners are enabled through our iPaaS integration Platform as a Service which enables complex workflows combined with external integrations.

7.1.14. Integration Requirements

- Robust APIs for PayJustNow, insurance, Finchoice, third-party partners, regulatory reporting

MVNE's platform has multiple integration capabilities and can integrate to the API's provided. We have well-documented APIs for seamless integration with all GCT platforms and third-party partners. Our integration platform is also in the process of PCI compliance.

7.1.15. Excluded Items

- Hardware procurement, marketing, customer acquisition, retail setup, postpaid, international roaming (unless requested)

These items are excluded from scope, except international roaming, which is available as an option for Full MVNOs and an option for eSIM roaming through the App. MVNE through our group sister company Broadbrand delivers AI driven digital marketing.

7.2. MVNO light (Digital Mobile) solution

The Digital Mobile (MVNO Light) solution is designed for rapid deployment, lower operational complexity, and cost efficiency. GCT would leverage DSG's own MVNO Digital Mobile. It is ideal for GCT's initial market entry or as a digital-only offering. There may be an opportunity for each brand in the group to have an MVNO of its own.

7.2.1. SIM Lifecycle Management & Provisioning

- **eSIM focus:** Digital onboarding and provisioning, with physical SIMs as an option.
- **Bulk/individual provisioning:** Managed via digital channels.
- **Churn management, inventory, and security:** Streamlined for digital operations.

7.2.2. Account Management

- **Digital onboarding:** Self-service account creation, upgrade, and closure.
- **Multi-SIM and hierarchy:** Supported but simplified for digital use cases.

7.2.3. Product and Bundling Management

- **Predefined bundles:** Voice, data, and SMS, with limited customisation.
- **Promotions and loyalty:** Supported via digital channels.

7.2.4. Activity and Recharge Management

- **Digital recharge:** App, web, and USSD.
- **Real-time balance:** Always available via digital self-service.

7.2.5. Event and Notification Management

- **Digital notifications:** SMS, email, and push for all key events.

7.2.6. Value-Added Services (VAS) Platform

- **Core VAS:** SMS, voicemail, USSD, WhatsApp.
- **API extensibility:** Available for digital partners.

7.2.7. Billing and Financial Management

- **Prepaid only:** Subscription and postpaid not included.
- **Automated invoicing and statements:** Digital delivery.

7.2.8. Regulatory & Compliance

- **Full RICA/eRICA compliance:** Digital KYC and reporting.
- **Number portability and lawful intercept:** Supported.

7.2.9. CRM and Administration

- **Digital CRM:** Real-time analytics, segmentation, and campaign management.

7.2.10. OSS/BSS

- **Core OSS/BSS:** Real-time charging, digital product catalogue, and dashboards.

7.2.11. Support & Service Desk

- **Digital-first support:** Chat, email, and knowledge base.
- **Escalation to 2nd/3rd line as required.**

7.2.12. Portal Management

- **Digital self-service portal:** Mobile and web, role-based, white labelled to match your brand.

7.2.13. Miscellaneous Services

- **Zero-rating and API-first:** Supported for digital partners.

7.2.14. Integration Requirements

- **APIs for digital partners:** Supported for digital partners.

7.2.15. Excluded Items

- **No hardware procurement, marketing, or physical retail.**
- **No postpaid or international roaming.**

8. PROPOSAL REQUIREMENTS

This section provides comprehensive information addressing all GCT requirements for vendor qualifications, experience, compliance, and supporting documentation. All content is structured to facilitate direct evaluation and due diligence.

8.1. Vendor Qualifications

8.1.1. Company Background & Profile

MVNE (Pty) Ltd is a leading Mobile Virtual Network Enabler (MVNE) in South Africa, established in 2013 as a wholly owned subsidiary of DSG. Our mission is to empower brands to launch and operate innovative MVNOs with minimal risk and maximum flexibility. We have a proven track record of delivering scalable, compliant, and future-proof mobile services platforms for a diverse range of clients.

- **Legal Entity:** MVNE (Pty) Ltd
- **Registration Number:** 2014/149886/07
- **BBBEE Status:** Level 2 Contributor
- **Head Office:** 15 6th Street, Parkhurst, Johannesburg, 2193
- **Cape Town Office:** Century City and Mutual Park.
- **Ownership Structure:** 100% owned by DSG
- **Financial Stability:** MVNE (Founded 2013) and DSG (Founded 1998) are profitable private companies, and we are willing to show financials at our offices, should we be selected to offer GCT services.

Organisational Structure:

MVNE operates with a flat, agile structure, enabling rapid decision-making and efficient project delivery. Our leadership team brings decades of experience in telecoms, IT, and customer experience.

Key Leadership Profiles:

- **Yaron Assabi – Founder & CEO, DSG**
[Yaron Assabi | LinkedIn](#)
- **Ferdi Gazendam – DSG Chairman and Director**
[Ferdi Gazendam | LinkedIn](#)
- **Hugo Mokken – CTO MVNE**

- **Brandon Meszaros – CEO CxG**

[Brandon Meszaros | LinkedIn](#)

MVNE Organogram

8.1.2. Account Management Structure

Each client is assigned a dedicated Account Director, supported by a cross-functional team covering project management, technical delivery, customer experience, and compliance.

8.1.3. Industry Focus and References

Industry Specialisation:

MVNE specialises in enabling MVNOs for fintech, retail, media, and enterprise clients. Our platform is designed for seamless integration with payment, lending, and insurance ecosystems, making us the ideal partner for GCT's ambitions.

8.1.4. MVNO Client References

- **DSTV Internet** (Full MVNO, 36+ months)
Contact: Daniel Courtenay, daniel.courtenay@multichoice.co.za
- **Digital Mobile** (MVNO Light, recent launch)
Contact: Yaron Assabi, yaron@dsg.co.za

8.1.5. Leadership and Team

Project Team:

MVNE will assign a dedicated, multidisciplinary team to the GCT project, including:

- **Programme Director:** Overall project oversight and client liaison
- **Technical Lead:** Solution architecture, integration, and delivery

- **Implementation Manager:** Day-to-day project management
- **Customer Experience Lead:** Onboarding, support, and journey design
- **Compliance Officer:** Regulatory and data protection oversight
- **Support Team:** 24/7 technical and operational support

MVNE as a wholly owned subsidiary of DSG (www.dsg.co.za) which allows our customers to tap into group resources and services as well as strategic partners.

8.1.6. Credentials

- **Years of Operation:** 13+ years in MVNE/MVNO enablement
- **Certifications:** We have initiated ISO compliance, and our integration partner platform is PCI compliant.
- **Technical Partnerships:**
 - MTN (MNO partner) We are Network Agnostic and can integrate to other networks as well
 - Pharos Avantgard (USSD, SMSC, PCRF)
 - Globetom (iPaaS, BSS)
 - Flolive (IoT/eSIM)
 - NetEngage (Converged Billing)

8.1.7. Financial Stability

MVNE financials can be viewed at MVNEs offices should we be selected as a partner.

8.1.8. Geographic and Operational Requirements

- **Local Support:** MVNE and DSG Group have Operational presence in Johannesburg and Cape Town, with on-the-ground support for the Western Cape and Gauteng regions.
- **South African Market Experience:** MVNE has extensive experience launching and operating MVNOs in the South African regulatory environment.
- **Regulatory Understanding:** MVNE also has a deep knowledge of ICASA, RICA, POPIA, and all relevant telecom and data protection regulations, with advisory services on ICASA and RICA compliance.

8.1.9. Risk Mitigation Framework

Comprehensive Risk Assessment:

MVNE employs a structured risk management approach, including:

- **Risk Identification:** Market, Business operational, Financial, Strategic, Security, Technical, and Regulatory Compliance risks are identified at project inception and updated at regular intervals through the project lifecycle.
- **Mitigation Strategies:** Each risk is assigned a mitigation plan, owner, and monitoring process. These include Risk Mitigation, Risk Avoidance, Risk Transference, Risk Acceptance, and Risk to Opportunity Conversion.
- **Business Continuity:** MVNE employs a geo-redundant infrastructure, disaster recovery plans, and do regular failover testing.
- **Insurance Coverage:** Please see appendix G
- **Contingency Planning:** Documented escalation and communication protocols for all critical incidents.

Examples of Successful Risk Management:

For each of our engagements we develop a Risk Register with our client so that we ensure that all risk areas are covered.

RISK REGISTER

[illegible]

4.3 Documentation and Commercial Requirements

8.1.10. Technical Documentation

- Complete API documentation for all platform services (API document in appendix B)
- Integration guides for PayJustNow, Finchoice, and insurance platforms (Depending on the direction of integration API documentation can be used or integration platform utilised for GCT integration)
- System architecture diagrams and scalability documentation

Logical Architecture & Integration Points & Connectivity

Orcha

Scalable Footprint

Both horizontal and vertical scaling is possible.

- Security frameworks and compliance documentation can be viewed once MVNE is selected as a partner.

8.1.11. Commercial and Legal Terms

- Project build phase and operational phase terms and conditions – See contract appendix E+F
- Detailed service-level agreements (SLAs) and performance metrics - See contract appendix E+F
- Service level rebates and penalties for SLA non-compliance See contract appendix E+F

8.1.11.1. Full MVNO

8.1.11.1.1. Towards a launch

Our process is as follows:

MVP ₁	Packages, Deals and specific products and services that will be sold at launch, forming a Minimum Viable Customer Launch Proposition
OM ₂	An Operating Model, including a high-level Technical Architecture & relational diagram between Parties defining the functional responsibilities.
GTMP ₃	A Go-to-Market plan, including Sales, Distribution, Customer Care and Subscriber Life Cycle Management
ICX ₄	An Integrated Customer Experience, including Customer Journeys and high-level business processes.
BM ₅	A granular 60-month business plan and commercial viability analysis.

8.1.11.1.2. Minimum Viable Customer Launch Proposition

How we build the MVP:

- 1) Leverage GCT current core business products and services and combine with the MVNO proposition
- 2) Create a non-comparative proposition
- 3) Create better customer engagement
- 4) Leverage greater customer insights
- 5) Understand how to drive uptake of the core proposition
- 6) Design for greater retention
- 7) Design for greater security

Building blocks of a customer value proposition

In order to model the business, we have developed the following MVNO Prepaid MVPs for GCT:

These MVP packages are illustrative and will likely change.

Baseline Weekly Prepaid Packages	Inclusive Minutes used Per Month	Inclusive Megabytes used Per Month	Inclusive SMS used Per Month
GCT 1.5GB	10 MIN	1 536 MB	20 SMS
GCT 3GB	20 MIN	3 072 MB	50 SMS
GCT 5GB	30 MIN	5 325 MB	100 SMS
GCT 10 GB	40 MIN	10 445 MB	200 SMS

The true advantage of these bundles lies in their seamless integration with the **GCT ecosystem** — combining your core products and services into a unified, high-impact value proposition that competitors cannot easily replicate.

By connecting **your platforms**, and your broader portfolio of **products and incentive programs**, we create an interconnected experience that amplifies customer engagement, enhances retention, and accelerates the strategic outcomes.

8.1.11.1.3. A Collaborative Operating Model

Through a collaborative approach, partnering with mobile network operators and enablers alike, GCT Mobile would be in a position to create a sophisticated eco system without having to build the skills or invest in the technology required.

This approach serves to limit the disruption of GCT existing businesses, accelerates time to market, requires minimal integration, reduces the cost and improves the efficiency of the overall operating model, leveraging the skills of existing players and benefitting from the economies of scale inherent in these existing businesses.

Structure of a collaborative MVNO

Structure of a collaborative MVNO

Resource requirements

Roles and responsibilities

The collaboration with MVNE provides GCT with an extremely easy entry into the market whilst minimising costs significantly.

Roles and responsibilities

The collaboration with MVNE provides Weaver Fintech with an extremely easy entry into the market whilst minimizing costs significantly

MVNE will provide industry expertise and drive the MVNO operationally and technically, and provide commercial expertise to optimize Digital Strategy and monetise Supporter engagement with the brand using mobile as the rewarding mechanism to achieve this

MVNE will provide industry expertise and drive the MVNO operationally and technically, while providing commercial expertise to optimise the Digital Strategy and monetise customer engagement with the brand using mobile as a rewarding mechanism to achieve this.

CONSIDERATIONS MODEL CONSTRUCT

Our **cost framework** is therefore **not tied to wholesale traffic**, but to the size of the **subscriber base**, limiting the impact on proposition viability and profitability

Our commercial model is entirely focused on the **provision of enablement services** and as such we charge the prospective **MVNO a monthly enablement fee** for these services as an indirect cost

- We facilitate the **network wholesale relationship** without markup
- **Professional services**, integration and related costs are negotiated during the implementation project

8.1.11.1.4. Go To Market

We put together a comprehensive sales matrix, to define all the sales channels and their functions to drive sales.

	Sales pre paid and SIMs	Hybrid Prepaid contracts	KYC	Upfront payment				Care	Recharge
				eft	cash	cc	dd		
HO		Y						Y	
Call centre outbound	Y	Y						Y	
Call centre Inbound	Y	Y						Y	
Agents	Y		Y	Y	Y	Y	Y	Y	Y
Branches	Y	Y	Y	Y	Y	Y	Y	Y	Y
App and Online	Y	Y	Y	Y	Y	Y	Y	Y	Y

Real time RICA

Channels to the market

8.1.11.1.5. Integrated Customer Experience

Leveraging MVNEs sister company CxG we enable exceptional world class solutions to ensure your customers have all encompassing support.

Care matrix

We develop detailed customer journeys

	Balance	Renewal	Cancel	Billing	SIM Swap	Soft lock	Update details	Recharge	eQuery	Network query	Usage query	Payment Query	Roaming
HO													
Call centre outbound													
Call centre Inbound	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
Agents	Y				Y			Y					
USSD	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
IVR	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
WEB	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
App	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
Branches	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
FB	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y

Instagram	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y

Key touchpoints

Comprehensive Customer Care Touchpoints

1. Call Centres:
Inbound: Handles queries like balance, billing, SIM swaps, cancellations, and roaming.
2. Digital Self-Service Platforms:
App, Website, and IVR enable self-service for all categories (e.g. recharge, payment queries).
3. Social Media Integration:
Channels like Facebook, WhatsApp, and Instagram for accessible and responsive customer interaction.

4. Physical Support:
Agent, merchants, bank branches and experience centres for personal, face-to-face assistance.
5. USSD Services:
Quick and easy query resolution.
6. Leverage CRM
Build detailed customer profiles that track all activity and enable seamless use of any channel.

Omni channel experience

8.1.11.1.6. Pricing for full MVNO

All Prices (ex VAT)

MVNO Setup	\$250,000	
Minimum monthly commitment	\$25,000	Or a fee per subscriber, whichever is larger: R15 per sub - 0-1m subs R12 per sub - 1m-2m subs R9 per sub - 2m + subs
Contact centre seat	\$1,700 per seat	2,700 call per agent per month
MNO contract	Any MNO guarantees	MVNE will initiate MNO negotiations.

8.1.11.2. MVNO Light

This part of the proposal outlines the terms for the configuration of the Digital Mobile (DM) DSGs own MVNO and technology platforms for a profit share arrangement by GCT, as an alternative to a full MVNO. This project will follow the detailed Scope of Work (SOW) as documented below. The project will run from **the date of signature of a contract between GCT and Digital Mobile. This option can only go ahead when an MNO is secured and 3 other MVNOs have signed with MVNE in Nigeria for Light MVNOs.**

8.1.11.3. Scope of Work

The Scope of Work outlines the following key areas:

1) Implementation scoping (approx. 1 month)

1) Business requirements specification definition

- Both parties to sign off

2) Technical specifications definition

- DM to develop and both parties to sign off

3) Document customer journey mapping

- GCT and DM to sign off

4) Develop DARE model

- GCT and DM to sign off

2) Implementation, Integration and Business simulation (approx. 1 month)

1) DM builds the MVNO services

- DM builds the MVNO services on its platforms

2) Mobile Network Operator/s build/s services for DM

- Mobile Network Operator/s configures the MVNO services

4) Order first batch of SIMs

- SIMs are ready for the MVNO services

5) Go live

- Launch to the market

8.1.11.4. Light MVNO Commercial Terms

The costs of this project will be structured around the configuration and operating of the Digital Mobile MVNO for GCT. There is a once off project set up fee, paid up front, and then there are minimum guaranteed Subscriber fees up to a 10,000-subscriber threshold and over that a fee per the number of active subscribers from Go Live.

Project fees

\$20,000 once off

Minimum guaranteed Subscriber fees and Subscriber fees after threshold and other costs

There are no other upfront costs from either party as agreed:

	GCT	DM	Ex vat costs
Web development	X		Any changes to the web site will be covered by GCT or we can provide a white-labelled website.
MVNO platform deployment		X	This will be covered under DM existing infrastructure costs.

Monthly Costs

	GCT	DM	Ex vat costs
Call Centre		X	This will be run by CXG, managed by DM
Logistics		X	This will be charged at R40 per SIM delivery
Airtime Recharges		X	Using DM distribution channels
Monthly management and platform fee		X	DM will invoice GCT R75k per month or R7.50 per active subscriber, whichever is higher.
SIM card costs		X	DM will provide SIM cards invoiced at R12 per sim card
Paperless RICA		X	DM will provide Paperless RICA invoiced at R8 per sim card

Example costs

Nett profit framework

ARPU N8,800,00

COS

Wholesale Costs	N4,400,00	Dependent on final product
DM cost	\$0.48	\$0.48 per subscriber or \$5,000 whichever is higher
Call centre cost (if applicable)	N263,00	Cost based on one call contact
Airtime distribution cost	N616,00	7% if through third parties, free if on website or App
Net profit	N2861,00	

GCT Share N1430.50

DM Share N1430.50

Once off costs per sale

Logistics cost if applicable N3571,00

SIM card Cost N1055,00

Paperless RICA N967,00

8.1.12. Implementation Roadmap

MVNE's Full MVNO Project Implementation Plan (indicative, subject to joint planning):

MVNE's MVNO light Project Implementation Plan (indicative, subject to joint planning):

Phase	Duration	Key Activities
Project Kick-off	Week 1	Contract finalisation, project governance, stakeholder alignment
Requirements & Design	Weeks 2–4	Detailed requirements gathering, solution design, integration planning
Platform Configuration	Weeks 5–8	System configuration, product catalogue setup, API integration
Testing & UAT	Weeks 9–12	System integration testing, user acceptance testing, regulatory compliance checks
Training & Onboarding	Weeks 13–14	Training for GCT teams, documentation handover
Go-Live Preparation	Weeks 15–16	Final data migration, operational readiness, go-live rehearsals
Service Launch	By 1 June 2026	MVNO service launch, post-launch support, performance monitoring

Note:

- Agile project management methodology will be used, with regular sprint reviews and stakeholder updates.
- A detailed Gantt chart and resource allocation plan will be provided upon project award.

8.1.13. Key Success Factors

- **Adherence to Timeline:** MVNE has a proven track record of meeting aggressive project deadlines.
- **Stakeholder Engagement:** Regular project governance meetings and transparent communication.
- **Risk Management:** Proactive identification and mitigation of risks throughout the project lifecycle.
- **Quality Assurance:** Rigorous testing, compliance checks, and user training to ensure a

9. TERMS & CONDITIONS

This section sets out the principal terms and conditions applicable to MVNE (Pty) Ltd's response to GCT for MVNO Platform Services. These terms are designed to ensure clarity, compliance, and mutual protection for both parties throughout the tender process and subsequent project phases.

9.1. Proposal Validity

- All proposals submitted by MVNE (Pty) Ltd shall remain valid and binding for a minimum period of **90 days** from the submission deadline, unless otherwise agreed in writing.

9.2. Confidentiality

- All information contained in this RFP response is confidential and proprietary to MVNE (Pty) Ltd.
- Recipients agree to:
 - Maintain strict confidentiality of all contents.
 - Use information solely for proposal preparation and evaluation purposes.
 - Return or destroy all materials upon request.
 - Not disclose information to third parties without written consent from MVNE (Pty) Ltd.

9.3. No Guarantee of Award

- This response does not constitute a commitment by MVNE (Pty) Ltd to contract for services.
- GCT reserves the right to:
 - Reject any or all proposals.
 - Cancel this process at any time.
 - Request additional information or clarifications.

- Negotiate with selected vendors.
- Award contracts to multiple vendors.

9.4. Proposal Expenses

- All costs associated with proposal preparation and submission are the responsibility of MVNE (Pty) Ltd.
- GCT shall not be liable for any costs incurred by the respondent in connection with this process.

9.5. Intellectual Property

- Proprietary methodologies and pre-existing intellectual property remain the property of MVNE (Pty) Ltd.

9.6. Vendor Obligations

- **Accuracy of Information:**
MVNE (Pty) Ltd is responsible for the accuracy and completeness of all information provided in its proposal.
- **Compliance:**
MVNE (Pty) Ltd will comply with all applicable Nigerian laws and regulations, including but not limited to:
 - Telecommunications regulations
 - Data protection and privacy laws
 - Employment and labour laws
 - Tax and financial reporting requirements

9.7. Insurance Requirements

- MVNE (Pty) Ltd maintains appropriate insurance coverage, including:
 - Professional indemnity insurance

9.8. Contract Terms Preview

- **Service-Level Agreements (SLAs):**
Final contracts will include comprehensive SLAs covering:
 - System availability and performance metrics
 - Response times for support and maintenance
 - Resolution timeframes for different issue categories
 - Financial rebates for non-compliance
 - Draft contract in the appendices

9.9. Data Protection and Security

- MVNE (Pty) Ltd enforces strict data protection requirements, including:

- Secure data handling and storage procedures
- Regular security audits and assessments
- Incident response and notification requirements

9.10. Termination Rights

- GCT reserves the right to terminate agreements for:
 - Material breach of contract terms
 - Failure to meet service-level requirements
 - Insolvency or financial instability of the vendor
 - Change in control or ownership of the vendor – DSG has concluded a BEE deal and there may be other minority ownership changes in the future.

9.11. Dispute Resolution

- Any disputes arising from this RFP or subsequent contract will be resolved through good faith negotiations between the parties.
- If unresolved, disputes will be referred to mediation or arbitration in accordance with South African law.

9.12. Governing Law

- This RFP and any subsequent contract shall be governed by and construed in accordance with the laws of the Republic of South Africa.

10. APPENDICES

The following appendices are included to provide supporting evidence, technical detail, and compliance documentation. Where indicated, placeholders are provided for your team to insert specific documents (e.g., certificates, CVs, financials).

Appendix A: Company Information

- **Company Profile:**
Please see section 6 above
- **Organisational Structure:**
Please see section 6 above
- **Key Personnel:**
CVs and professional profiles of directors, project leads, and key technical staff.
Attached as Appendix 1

Appendix B: Technical Integration Requirements

- **API Documentation:**
Comprehensive documentation for all platform APIs, including endpoints for provisioning, billing, customer management, and VAS is included as appendix B.
- **Integration Guides:**
As per API documentation, support is also supplied to assist in your integration included as appendix B.
- **System Architecture Diagrams:**
Visual representations of the Full MVNO and MVNO Light (Digital Mobile) solutions, including network topology, OSS/BSS stack, and data flows, as shown in the main body of this document.
- **Security and Compliance Frameworks:**
We utilise data encryption in transit using HTTPS, our environment is DMZd, we have continual active security monitoring with end point and firewall protection.

Appendix C: Reference Check Form

- **Client References:**
Contact details and project summaries for DSTV Internet and Digital Mobile.
- **Reference Check Template:**
Standardised form for GCT to use in direct reference checks.

Appendix D: Terms and Conditions

- **Project Terms and Conditions:**
Detailed legal terms for the build and operational phases – Please see contract attached as Appendix E+F
- **Service-Level Agreements (SLAs):**
Sample SLA template, including performance metrics, response times, and penalties for non-compliance – Please see contract attached as Appendix E+F
- **Intellectual Property and Confidentiality Provisions:**
Statements outlining ownership and use of proprietary materials – Please see contract attached as Appendix E+F

Appendix e: Sample Service-Level Agreement (SLA) Template

- **SLA Document:**
Template covering system availability, support response times, escalation procedures, and service credits – Please see contract attached as Appendix E+F
