

GCT MVNE Appendix A

Resumes and Qualifications:

Hugo Mokken

Pretoria, South Africa | +27 83 633 8550 | <https://www.linkedin.com/in/hugomokken/>

Profile Summary

Experienced CTIO and Telecoms Solution Architect with over 25 years of international experience spanning telecommunications, software integration, and MVNE/MVNO environments. Skilled in solution design, architecture simplification, operational leadership, and project delivery across Africa, the Americas, and Asia. Recognized for building high-performing technical teams, driving innovation, and implementing scalable telecoms solutions with a focus on efficiency, automation, and customer experience.

Key Expertise

- Solution Architecture & Design for MVNE/MVNO ecosystems
- Project & Operations Management (CTO/CTIO level)
- Telecoms Core, Charging, VAS, and OCS Implementations
- Integration, Support & NOC Management
- Pricing Strategy, Pre-sales & Business Development
- Vendor Selection, Security Management & Process Design
- International Project Delivery (Americas, Africa, Asia)
- Scripting & Automation (Perl, Bash, Linux)

Career Highlights

- CTIO – MVNE (2021–Present)
 - Lead architecture and implementation of telecom solutions for MVNE and MVNO clients.
 - Define strategic technical direction, vendor management, and system security.
 - Established monitoring and auditing systems and drove innovation initiatives.
- Solutions Director – MVNX Mobile (2019–2021)
 - Directed the solution design and technical implementation of MVNE systems.
 - Improved operational processes, developed a NOC, and managed integrations and vendor relations.
- Head of Pre-Sales / CTO / Product Owner – Digitata Technologies (2009–2019)
 - Led international pre-sales and consulting engagements across the Americas.
 - Launched multiple operators (e.g., Digicel Jamaica, Suriname).
 - Directed Support & Integration division, implemented monitoring tools, and managed product strategy.
- Earlier Roles (1995–2008)

- Held senior technical and integration roles at Movius, Atos Origin, and MTN South Africa, focusing on network support, VAS systems, and complex integrations.

Education & Certifications

- Agile Project Management – University of Cape Town
- Diploma in Datametrics (Programming, Statistics, Management) – University of South Africa
- National N6 Certificate in Electronic Engineering – Roodepoort College

Technical Skills

- Telecoms Core: SS7, SIGTRAN, Diameter, SMPP
- OS & Scripting: Linux/Unix, Bash, Perl
- APIs & Integrations, System Security, Business Continuity
- AI Coding & Automation
- IT Infrastructure & Operations Management

Professional Traits

Analytical and adaptable leader with a collaborative approach, strong communication skills, and a passion for innovation, problem-solving, and operational excellence.

Edward John Wicks

Capability Sheet: Mark Symes

Role: Operations Supervisor

Experience: 15+ years in Telecommunications, MVNO/MVNE Operations, Enterprise Connectivity, Field Services, and Sales Performance

Contact: symesmark1@gmail.com | 078 893 2588

Professional Overview

Mark Symes is an experienced operations and service-delivery professional with deep sectoral knowledge across South Africa's telecommunications landscape. He specialises in MVNE/MVNO operational administration, enterprise connectivity delivery, contractor oversight, billing assurance, and customer-focused service coordination. His ability to manage complex workflows and maintain operational accuracy makes him a reliable contributor to high-demand environments.

Core Competencies

- Network operations support, SIM provisioning, activations, and troubleshooting coordination
- Customer support escalation and service-issue resolution
- Billing verification, reconciliation, and revenue assurance processes
- SIM and inventory lifecycle management with accurate record-keeping
- Process efficiency optimisation and workflow improvement
- Project administration, documentation management, and vendor coordination

Relevant Experience

Mark's MVNE role focuses on ensuring seamless operational coordination, accurate project documentation, and strong cross-functional collaboration. His prior work at United Wireless included MTN Enterprise installations, Tarana FWA survey oversight, contractor training, quality control, and workflow management using MTN systems (Remedy and Click). He previously spent over a decade in enterprise and telecommunications sales, consistently achieving national recognition for top performance.

Technical Skills

- MS Word, Excel, Outlook – Advanced
- Pastel Evolution, Cactus.net – Advanced
- PowerPoint – Intermediate
- Operational platforms, workflow systems, and reporting tools

Value Proposition

Mark integrates operational rigour with customer-centred service delivery. His extensive experience enables him to support projects requiring disciplined execution, real-time coordination, and dependable administrative control. He adds immediate value to operational teams through his adaptability, attention to detail, and commitment to high-quality service outcomes.
